REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

- With respect to claim 1, the prior art of record fails to disclose and or teach a method of packaging product that comprises, among other steps, generating a rotational movement between a first (30) and a second (31) portion of a first suction gripping head (14) to rotate a first (4) and a second (5) lateral wall of a flat tubular package (3) with respect to each other so as to convert the flat tubular package from a flat configuration to an open configuration, wherein the first and the second portion are hinged to rotate about an axis of rotation, the first and second portion of the first suction gripping head comprising respective suction cups, and the suction cups of the second portion are fitted to the second portion to move in a direction perpendicular to the axis of rotation during the rotational movement between the first and second portions of the suction gripping head such that the flat tubular package is converted to an open tubular package without exerting stress on the wall gripped by the suction cups of the second portion.
- With respect to claims 15, the prior art of record fails to disclose and or teach a machine for packaging product that comprises, among other things, a suction gripping head having a first portion and a second portion hinged to the first portion, the first and second portion comprising respective suction cups, wherein the suction cups of the second portion are fitted to the second portion to move in a direction perpendicular to the axis of rotation during the rotational movement between the first and second portions of the suction gripping head such that the
